C&MS-22 AUGUST 1966

BULK COOLING TANKS ON FARMS
SUPPLYING FEDERAL MILK ORDER MARKETS, JANUARY 1966

In January 1966, producers who used bulk milk cooling tanks represented nearly 78 percent of all producers who delivered milk to handlers regulated under 72 comparable Federal milk order markets. These producers delivered nearly twice as much milk per producer as did those who shipped in cans, and they supplied 86.7 percent of the total amount of milk received from producers in these markets. Daily deliveries of milk per producer for those using bulk tanks averaged 1,058 pounds, while can shippers averaged only 571 pounds per day per producer.

As shown by the following summary, conversion to bulk tanks is virtually complete in most of the 72 markets:

<u>Percentage of total deliveries received from bulk tank producers</u>	<u>Number of markets</u>
100.0	28
95.0 - 99.9	34
90.0 - 94.9	1
85.0 - 89.9	8
47.5	1

Information from a group of 64 markets for which data were available for the past six years shows the extent to which producers have converted to bulk handling of milk. In January 1961, receipts from producers having bulk tanks represented 66.6 percent of the total in this group of markets. In 1966, bulk tank milk represented 85.9 percent of total receipts from producers in the 64 markets.

The number of bulk tanks, by size, was reported for 63 markets. Producers in these markets used a total of over 89 thousand tanks, most of which (55.5 percent) had capacities of 200-399 gallons. More than one-third of the tanks had capacities of 400 gallons or more, while tanks of less than 200 gallons accounted for only 8.2 percent of the total number reported.

This report was issued in January 1958 as AMS-261, "Survey of Bulk Milk Tanks on Farms of Producers Marketing Milk in Federal Order Markets." It was issued in July 1959 as "Bulk Milk Cooling Tanks on Farms of Producers Marketing Milk in Federal Order Markets, January 1959." It was issued under its present title in June 1960. It was issued under the present title (without the AMS series number) by the Agricultural Stabilization and Conservation Service in 1961, while that agency administered the Federal milk order program. It was last issued under the present title in June 1964. The name of the agency was changed to Consumer and Marketing Service in February 1965.
